

Pool Liners

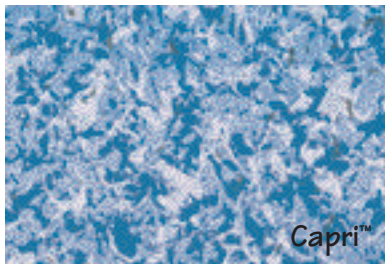

Lomart liners are produced at our modern manufacturing facility in Arkansas. We use a special blend of natural, raw materials that insures top-quality vinyl for all liners.

The ultra-violet inhibitors protect the liner from the sun's rays as well as enhance longer life. In addition, Lomart's quality premium liners are a full 20 Mils thick on both the sidewall and pool bottom to assure superior performance. All Lomart liners are sealed with **Fusion-Weld™** a sealing technique, unmatched in the industry, which provides durability and supreme quality. We are so sure of this sealing technique that we give all our liner seams the "Strongman" Warranty – 100% for 10 years.
