

Standard features include:

- One-piece thermoplastic tank for exceptional strength, corrosion resistance, and long life.
- Attractive almond color blends with any outdoor decor.
- Combination water and sand drain makes servicing and winterizing fast and easy.
- Special internal design keeps sand bed level for consistent performance and extended filter cycles.

So clean. So clear. So easy.

Sand filters are one of the most popular ways to filter water. For good reasons. They are simple, effective, and require very little attention. Pool water is routed through a sand-filled pressure vessel. The sand traps particles large and small...so small they are undetectable to the human eye. Over time, dirt accumulates in the spaces between the sand particles causing the pressure in the vessel to rise as water finds it harder to pass through. This signals you to “backwash” the filter. Simply reverse the water flow and “knock out” the dirt. What could be simpler.

But all sand filters are not created equal. For optimum filtration all the water must flow through the same amount of sand at the proper rate. That’s why all Pentair sand filters feature a special internal design that keeps the sand bed level, ensures even water flow, and results in the most efficient filtration possible. That’s why more than 2 million Pentair filters have been installed worldwide.

Sand Dollar is the perfect high performance sand filter. With its highly efficient design, Sand Dollar provides all the clean, crystal clear water your pool requires. Plus, it’s incredibly simple to operate and maintain, and it’s built with long-term reliability in mind.

Sand Dollar®

Top Mount Sand Filter

For maximum water clarity

Pool filter operation doesn't come any easier. The Sand Dollar's multi-port valve puts all filter functions right at your fingertips—just rotate the handle to the desired position and Sand Dollar does the rest for sure and simple operation.

Other features include:

- Top Mount 6-function 1½" multi-port valve features pressure gauge and manual air relief for optimum filtration efficiency.
- Internal design ensures that water is exposed to maximum surface area of sand for optimum filtration performance and efficient backwashing.
- One-year limited warranty. See warranty for details.

Sand Dollar Top Mount—Sand Filter

Model Number	Filter Area Sq. Ft.	Vertical* Clearance	Filter Diameter	Required Sand† (lbs.)	Flow Rate GPM	Turnover Capacity (Gallons)		
					Res.**	6hrs.	8hrs.	12hrs.
SD 35	1.4	36.75"	16"	100	35	12,600	16,800	25,200
SD 40	1.8	46"	19"	150	40	14,400	19,200	28,800
SD 60	2.3	50.5"	22"	250	60	21,600	28,800	43,200
SD 80	3.5	74"	26"	350	75	27,000	36,000	54,000

*Required clearance to remove the valve

**Maximum flow rate

†Use standard #20 silica sand
